

The best roof coating products - guaranteed

KOWHAI is the name you can trust for proven roof coating systems and professional service. Our quality products, advanced coatings technology and workmanship, are backed by the most comprehensive performance warranties in New Zealand.

KOWHAI TILECOAT SYSTEM™

1. CLEANING

The roof will be water blasted to remove all dirt, loose and flaking material. If moss and mould is present, the roof will be treated with Kowhai Koklean Green, a slow release, biodegradable, anti-fungicide treatment, before applying the TileCoat System.

2. PREPARATION AND REPAIRS

All tiles will be checked for cracks and replaced where required. Ridges and barges will be checked and where required will be replaced and repointed with the Kowhai flexible pointing system. Valleys will be checked, repaired and replaced as needed.

3. SEALING

The roof will then be sealed with Kowhai GreenSeal, to seal off any bare porous areas and to wet out old chalking paint. Kowhai GreenSeal ensures the adhesion of the Kowhai TileCoat System.

4. BASECOAT

Depending on the tile condition a basecoat may be applied to cover any roughness or pitting.

5. TILECOAT TOPCOATS

2 coats of Kowhai 100% Acrylic High Build paint will be applied to the colour of your choice.

Every Kowhai applicator warrants the work they do to the highest standard and as such, each job is warranted for 5 years from the time of completion and full payment made.

See your quote for terms and conditions of this warranty. Please note that due to the original condition of the roof/substrate, your Kowhai applicator may elect to contract out of this warranty period after consultation and explanation with the homeowner.

Kowhai Roof Coatings Ltd warrants the Kowhai products used in the full coating system, for a period of 12 years – pro-rated and transferrable (where the property and job details are captured on our work management system).

For the warranty to apply, regular roof cleans/moss kill treatments are required.
